### EXECUTIVE SUMMARY

**BION Solutions LLC** is a veteran-owned procurement, logistics, and mission-support partner serving preparedness, response, and recovery operations for government, defense, public safety, healthcare, and critical infrastructure stakeholders. Through global supply partnerships and disciplined execution, BION supports commodity sourcing, emergency procurement, operational continuity, surge mobilization, compliance, and traceable delivery for time-sensitive missions.

#### CORE CAPABILITIES

- **Products & Commodities:** Fuel and energy support, medical supplies, PPE, tools, IT technology, and mission-essential equipment.
- **Medical & Field Health Support:** IV solutions, pharmaceuticals, diagnostics, clinical devices, and consumables for institutional and response needs.
- **Mission Support & Staffing:** Professional personnel support for healthcare, emergency, administrative, and law-enforcement-related operations.
- **IT, Cybersecurity & AI Tools:** Field-ready cybersecurity infrastructure and multilingual communication tools for mission continuity.
- **Project Management & Consulting:** Operational planning, readiness support, and program oversight for compliance-heavy or multi-agency missions.

#### KEY DIFFERENTIATORS

- **FEMA-Style Readiness:** Built for preparedness, incident response, recovery support, and public-sector execution timelines.
- **Multi-Vertical Capability:** Integrated support across medical, fuel, staffing, mission gear, technology, and logistics requirements.
- **Global Procurement Network:** Dependable sourcing through certified manufacturing, supply, and strategic partner channels.
- **Traceability & Controls:** Documentation support, lot traceability, and controlled storage readiness where required.
- **Government-Aligned Execution:** Veteran-led, compliance-focused, and structured for federal, state, and emergency management buyers.

### PREPAREDNESS, RESPONSE & RECOVERY CAPABILITY

BION Solutions supports **FEMA-style response environments, defense and public-safety operations, healthcare systems, emergency management programs, and recovery missions** requiring rapid procurement, field support, emergency fueling, medical mobilization, staffing, and secure operational continuity. Our model is designed to help agencies move from readiness planning to mission execution with dependable supply-chain performance.

#### SELECTED PERFORMANCE & MISSION SUPPORT

**Public-Sector Readiness (2021-2024):** Supported TPWD and local police departments with mission-essential equipment and gear for operational readiness and response support.

**Defense Contingency Support (2018-2022):** Supported the AMED Fort Sam Houston biological training course with staff support, bio warfare and chemical warfare training support, product supply validations, and mission-readiness support.
